

ASHKAR M N

SOFTWARE ENGINEER | PYTHON | JAVA | BACKEND DEVELOPMENT | QA ENGINEER

Kottayam, Kerala, India | 8129559057 | ashkarbinnazar@gmail.com | linkedin.com/in/ashkarmn

PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in software development and software quality assurance (QA). Experienced in backend and full-stack development using Python, Django, JavaScript, PHP, REST APIs, MySQL, and MongoDB, building database-driven web applications with authentication and role-based access control (RBAC). Also experienced in manual, functional, end-to-end (E2E), API, automation, and performance testing using Playwright, Postman, and JMeter, with defect tracking in JIRA, Agile/Scrum, Git, and CI/CD using GitHub Actions.

EDUCATION

Master of Computer Applications (MCA) | APJ Abdul Kalam Technological University (KTU) | 2024-2026 | CGPA: 7.45

Bachelor of Computer Applications (BCA) | Mahatma Gandhi University (MG University) | 2021-2024 | CGPA: 66.11

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript (JS), TypeScript (TS), PHP, C, C++, Dart

Backend / API Development: Python, Django, PHP, REST APIs (RESTful Web Services), API Integration, Authentication, Role-Based Access Control (RBAC)

Frontend / Web Development: HTML5, CSS3, JavaScript, Bootstrap, Responsive Web Design

Databases: MySQL, MongoDB, SQL, Relational and NoSQL Database Design

Software Testing / QA: Manual Testing, Functional Testing, End-to-End (E2E) Testing, API Testing, Regression Testing, Performance and Load Testing

Test Automation Tools: Playwright, Postman, Apache JMeter, Page Object Model (POM)

Test Management & Defect Tracking: JIRA, Test Case Design and Execution, Test Plans, Bug Reporting

CI/CD, DevOps & Version Control: Git, GitHub, GitHub Actions, CI/CD Pipelines

Methodologies & Concepts: Agile/Scrum, Object-Oriented Programming (OOP), Data Structures, SDLC, STLC

Mobile & Tools: Flutter, Dart, VS Code, PyCharm, Android Studio, Linux

WORK EXPERIENCE

Regional Institute | Python Django & Flutter Developer Intern | 2 Months

- Developed backend REST APIs and authentication modules using Python and Django, implementing role-based access control (RBAC) and secure session handling.
- Designed and managed relational database schemas in MySQL, writing SQL queries for data retrieval, manipulation, and application integration.
- Built full-stack application workflows with third-party API integration and cross-platform mobile development using Flutter and Dart, following OOP principles and SDLC practices.

Testing Mavens | Software Testing / QA Engineer Intern | Jun 2026 - Aug 2026

- Designed, wrote, and executed test plans and test cases across manual, functional, end-to-end (E2E), API, and regression testing; documented and tracked defects to closure using JIRA.
- Developed test automation frameworks using Playwright with TypeScript and Page Object Model (POM), and performed REST API testing and validation using Postman.
- Executed Apache JMeter performance and load testing, analyzing response time, throughput, and error rate; collaborated in Agile/Scrum sprints using Git and GitHub Actions for CI/CD integration.

PROJECTS

AI CyberShield | Python, Django, MySQL, REST APIs

- Developed a full-stack cybersecurity web application in Python and Django to detect phishing URLs, malicious files, unsafe networks, and leaked credentials.
- Integrated third-party REST APIs (VirusTotal, LeakCheck) for real-time threat analysis, automated reporting, and security recommendations.
- Implemented role-based access control (RBAC) modules for Users, Experts, and Administrators with secure authentication and MySQL database design.

SpreeCommerce Storefront - QA Automation | Playwright, TypeScript, Postman, JMeter

- Performed manual, functional, and end-to-end (E2E) testing of core e-commerce workflows, authoring test cases and documenting defects.
- Built automated regression test suites using Playwright with TypeScript and Page Object Model (POM), and validated REST APIs using Postman.
- Executed Apache JMeter performance and load tests, analyzing response time, throughput, and error rate to identify reliability bottlenecks.

NewsRater | Python, MySQL, MongoDB

- Developed a database-driven platform enabling users to upload and sell real-time news videos to media organizations.
- Implemented secure data handling, user authentication, and content management for user-generated media.
- Integrated MySQL and MongoDB for relational and NoSQL data storage, supporting content verification and purchase workflows.

E-Learning Platform | PHP, MySQL, HTML, CSS, JavaScript

- Developed a web-based academic management system for course management, assessments, and reporting.
- Automated manual academic processes through digital workflows, improving operational efficiency.
- Implemented role-based access control for students, teachers, and administrators with MySQL-backed data management.

Online Car Parking System | PHP, MySQL, HTML, CSS

- Developed a responsive web application for real-time parking slot search and reservation.
- Built database-driven booking management with SQL queries for availability tracking and reservation data.
- Improved end-user workflow through digital booking, replacing manual parking allocation processes.
